

# STOCK NEWS FEEDER

Dear Stock Traders,

News Feeder Is An Improved & Enhanced Software Alternative To AmiPro & ForexPro. During Market Hours, Numerous Signals Are Generated More or Less For All Scripts. According To Our Chart Parameter Settings, Most of The Signals Reach Target & Some Not. In News Feeder, You Will Get The Filtered Signals (Not All As In Case of AmiPro & ForexPro), With Assistance From Our End.

If You Are Bored of Using Automatic Buy Sell Signal Software For AmiBroker & MetaTrader & Want Something Different, Then You Have Visited The Right Page. Our News Feeder Does The Job For You. It's A Simple Program Designed For All Platform Traders In Which You Do Not Have To Sit In Front of Your Computer & Watch The Charts Continuously. This Software Will Pop Up Signals Automatically In Your Laptop, Desktop & Mobile As You Are Supposed To Get Using Buy Sell Signal Software In Your Desktop, But Without Using It Actually.

This Software Would Pop Up Best & Selective Signals Directly From Our Signal List As Generated By Our Buy Sell Program. Signal Alerts Will Be Automatically Popped Up At Your End Daily, But Only For NSE Equity & Futures Market. You Simply Need To Start The Application & Wait.

As You Are Getting These Signals Without Using Buy Sell Software & Observing Charts Continuously For All Symbols, So You Need To Pay For This On Monthly Basis. You Do Not Need To Waste Your Time, Use Your Brain & Symbol Finding Through Live Scanner In Alert Output Window. All You Need To Do Is Start News Feeder & Wait For Pop Up Alerts.

Finally, Please Do Not Think That Feeder Can Make You Rich Overnight or Within A Week. Feeder Is Being Designed For Today's Fast Life Traders, Those Who Do Not Have Sufficient Time To Sit Constantly In Front of Computers. As Everyone Needs To Do Multitasking, So This Feeder Can Help Them Hopefully In Their Life & Survival Race.
